Looking for a position where I can develop my talents in a fast-paced work atmosphere, work with teams, and create creative solutions.

TECHNICAL SKILLS

Front-End: HTML | CSS | SASS | JavaScript | React JS.

Back-End: Java | MySQL.

UI/UX Design: Media Query, Responsive Units | Bootstrap | Tailwind CSS | Figma.

Source code management: Git | Github.

PROJECTS

Saudia Arabia Tourism ∞

Developed a comprehensive web application for a Saudi Arabia tourism project using HTML, CSS, JavaScript, and React.js. The site features travel information, hotel and flight booking, an activities page, cultural events in Saudi Arabia, and travel tips. Implemented media queries for a fully responsive design.

Flipkart Clone website ∞

Using HTML, CSS, and React.Js, a workable Flipkart clone was developed, with a focus on dynamic product listings, responsive layout design, and user-friendly interfaces. To guarantee scalability, component-based design and state management were implemented. This project demonstrates my expertise in front-end development and my capacity to provide e-commerce solutions that are compelling.

Skydiving Booking Website ∞

A complete skydiving booking website was developed using React.js, HTML, CSS, and JavaScript. numerous pages, including the sections for booking, about us, contact us, signup, sign in, and admin, were created and performed. integrated booking administration, user identification, and responsive design to create a seamless and engaging user experience.

EXPERIENCE

Frontend Developer Intern

Netkathir Technologies

- Created websites for booking skydiving and Saudi tour packages using React, HTML, and CSS and JavaScript.
- Developed and implemented booking system, interactive tour packages, and responsive user interface.
- Acquired practical knowledge of front-end development techniques and worked well in a group setting.
